Report to Partnership Meeting 22 April 2022

FINANCE

HITRANS Business Plan for 2022-23

SUMMARY

The Report seeks approval from the Partnership for the HITRANS Business Plan for 2022/23. The Business Plan sets out how we intend to support delivery of our Strategy during 2022/23 working with our constituent Councils and Stakeholders with a view to improving transport services across the Highlands and Islands. As with previous Business Plans the programme of work set out includes a 2 year Research and Strategy Development Programme in line with the recommendation of the Partnership Board discussion at the February 2022 meeting.

BACKGROUND

The Business Plan sets out the planned activities of the Highlands and Islands Transport Partnership (HITRANS) and where we will focus our energy and resources in partnership working with our constituent Councils and key stakeholders. The objective of our work will be to improve the delivery of transport services across the Highlands and Islands. The Business Plan defines how we will move forward in promoting and implementing our Regional Transport Strategy (RTS).

The Scottish Government published guidance on Regional Transport Strategies in March 2006. Paragraph 112 of the Guidance requires the preparation of an annual delivery or business plan to be submitted to Scottish Ministers. HITRANS completed a refresh of our Regional Transport Strategy in 2018 but Ministerial approval was placed on hold pending completion of the National Transport Strategy. This draft Strategy has been published on the HITRANS website as it has Board and Partner Council approval and it sets out how the Partnership will work and the priorities we (and our partners) identify to optimise transport connectivity to and within our region. Following publication of the draft Strategic Transport Projects Review HITRANS are undertaking a full update of the 2018 RTS to ensure the Strategy fits with National Policy and Planning.

The Business Plan as included in the Appendix to this report is intended to fulfil our requirement to produce such a document. After approval by the HITRANS Board this will be submitted to Scottish Ministers.

RISK REGISTER

RTS Delivery

Impact - Positive

Comment – The aim of the Business Plan is to promote delivery of the RTS through the actions identified in the Plan

Policy

Impact – Positive

Comment - HITRANS is bound to produce a Business Plan detailing its intentions for the period covered by the Plan, and provide a copy of the Approved Plan to Scottish Ministers

Financial

Impact – Positive

Budget line and value – Funding of the commitments in the Business Plan can be met within the 2022/23 Budget and the Plan sets out how this will be managed across all budget areas.

Equality

Impact – Positive

Comment – Equality is always central to our actions, and the 2022/23 Business Plan includes actions which will improve equality of access and opportunity across transport services.

RECOMMENDATIONS

The Partnership is asked to

1. Approve the Business Plan for Financial Year 2022/23.

Report by:	Ranald Robertson

1. Foreword

As we embark on a new financial year we are looking forward to the journey towards the new normal that will see our staff adopt a hybrid working and enjoy more face to face contact. The pandemic has brought many challenges but a positive has been the agility shown by businesses to adopt new practices that will hopefully change the pressure on our transport networks. We now need to work with partners to ensure that sustainable transport grows with more people travelling actively and flexible fares and planning / payment tools like our GO-HI platform helping to encourage people to choose public transport for those essential longer trips.

HITRANS Business Plan for 2022/23 sets out where HITRANS will focus our efforts and resources in the year ahead. The Plan aims to link our work plan to the Regional Transport Strategy and sets out how we will work with our partners and stakeholders to achieve our objectives. As ever HITRANS will look to respond to events and new opportunities.

HITRANS continue to focus on developing and delivering the Regional Transport Strategy for the Highlands and Islands. Our focus is on enhancing the region's viability and has the core aim of enabling sustainable economic growth across the Highlands and Islands to be supported by a modern transport system that meets the needs of our region. In 2022/23, we have several important actions to take forward. Public finance and the funding pressures associated with it continue to provide a challenge but we feel real progress is being made in developing efficient working practices and models through partnership working. Our core aim is to support our partner Local Authorities, Scottish Government and other partners in delivering improved transport services across the Highlands and Islands.

We will continue to work hard to attract external funding and focus on a partnership approach to delivery. HITRANS are now in a good place in terms of the framework under which we operate to step forward confidently to support the delivery of good transport services for the people and places of our region. While EU funding is no longer the option it has been in the past for HITRANS we have still secured funding through the Horizon Europe programme for the RURALITIES project. This means that EU funds will continue to be available in the coming period and we will continue to look to Horizon Europe for funding opportunities. Our work in the SATE project has already seen us secure funds through UKRI and we have enjoyed success in bidding to Transport Scotland for funds for Active Travel, MaaS, EV Infrastructure and Mobility Hubs. We have made the case to Scottish Government that new funding is needed to support rural passenger transport services and HITRANS could be a delivery agent for a fairer funding settlement for rural transport. We have partnered with Councils on bids to the Bus Partnership Fund and will continue to look to work with partner Councils around Levelling Up Funding and Shared Prosperity Fund.

As work on STPR winds down HITRANS will respond to the consultation on the draft STPR. We are also looking forward to supporting the development of Island Connectivity Plans and will make the case for targeted investment to return resilience to our external ferry services and make sure internal connectivity within our islands is given proper attention. Lifeline ferry services operated by our partner Councils in Highland, Orkney and Argyll and Bute need full revenue support and the same priority to capital investment that recognises these fleets and the infrastructure they operate to is generally older than the Scottish Government supported networks.

HITRANS will continue to build on our partnerships with Transport Scotland and Sustrans on active travel development. Our Active Travel Strategy for the region provides a useful advocacy document for walking and cycling and is designed to identify opportunities to deliver improvements in active travel that promote modal shift towards more sustainable travel choices.

Work on public transport will include welcoming the delivery of the Inverness Airport Station that HITRANS has long been the lead local actor in making the case for this development. We will continue to work with Network Rail, ScotRail and partner Councils on the Inverness Station Masterplan and the development of a similar approach for Oban Station.

2022/23 is an important year for HITRANS as we enter a new local government cycle. This will inevitably mean changes for HITRANS as we welcome some new Board Members from our Partner Councils. Collaboration and good personal and professional relationships have always been at the heart of HITRANS success, and this starts at our Board. To our five Council Board members who have served HITRANS so well over the past five years we wish our warm and sincere thanks and best wishes for the future.

Our Business Plan for 2022/23 sets out how we intend to achieve the objectives detailed above as well as moving forward several other actions. It sets out how the Partnership will work throughout the year underlining the need to be nimble at times. We are committed at all levels to focus on a strong partnership approach to delivery to ensure scarce resources are targeted in the most efficient manner to achieve the best result for the Highlands and Islands.

Allan Henderson
Chair

Ranald Robertson
Partnership Director

2. Guidance

The Scottish Executive published guidance on Regional Transport Strategies in March 2006. Paragraph 112 of the Guidance requires the preparation of an annual delivery or business plan to be submitted to Scottish Ministers. The plan should normally cover the first three years of implementation of the Regional Transport Strategy, and be updated annually to reflect local and central government planning and funding cycles and include plans for capital and revenue spending and borrowing.

HITRANS have produced this single year Business Plan identifying our intentions in 2022/23. The Business Plan will again include a two-year Research and Strategy Delivery Programme that will include an indicative programme of projects for 2023/24. This Business Plan is intended to fulfill our statutory duty and, after approval by the HITRANS Board, will be submitted to Scottish Ministers.

It describes the good governance procedures adopted by HITRANS and defines the areas where HITRANS may in time seek additional powers beyond the current Model 1 level. It forms the basis, with the detailed draft Delivery Plan linked to the Partnership's Transport Strategy which is currently being renewed, of HITRANS' ongoing input to partner authorities' transport prioritisation, the related and developing Community Planning Partnership Local Outcome Improvement Plans, and with Government for future bids for finance.

3. The HITRANS Board

HITRANS was established by the Transport (Scotland) Act 2005 (“the Act”) and subordinate legislation, namely the Regional Transport Partnership (Establishment, Constitution and Membership) (Scotland) Order 2005. The Order came into effect - and HITRANS came into existence - on 1st December 2005. The Partnership operates in terms of the Act and the Order. Although “the Board” is not a statutory term for Regional Transport Partnerships, it is a useful term for distinguishing between HITRANS’ main decision making body, i.e. the members meeting together, from the Partnership as a corporate entity comprised of members, officials and other associated groups.

Membership

In terms of the Order which established HITRANS, members consist of a total of 5 Councillor members from the constituent councils, The Highland Council, Moray Council, Argyll and Bute Council, Comhairle nan Eilean Siar, and Orkney Islands Council. In addition, HITRANS is entitled to have between 2 and 3 other (non-Councillor) members (paragraph 1(2) of Schedule 2 of the Order) which, during the period ending with the ordinary elections for Councillors in 2007, were appointed by the Scottish Ministers and have subsequently been appointed by the Partnership with the agreement of Scottish Ministers.

The current Chair, Councillor Allan Henderson, and Vice Chair, Councillor John Cowe were appointed on 23 June 2017.

The Partnership has a full quota of 5 Councillor members and currently has 3 other (non-Councillor) members.

To ensure that quorate decisions are achieved an annual calendar of meetings was agreed in September 2021 to provide notice for Members to include the meetings in their diaries. Four full Partnership meetings are scheduled for the calendar year. Meetings are being held in February, April, September and November. Should a situation arise that requires the call of additional meetings these can be called in accordance with the Standing Orders. Details of all Board Meetings, Agendas and Minutes are available on the HITRANS website.

Performance and Audit

Good governance of any corporate body involves three elements of a constant cycle: planning, performance and scrutiny. Proper scrutiny, which reviews performance and informs the next phase of planning of an organisation’s activities, is often most difficult to achieve. However, for organisations such as HITRANS, it is essential that there are appropriate mechanisms for review of all the Partnership’s activities.

4. Governance

Good governance is essential to any public body and HITRANS is no exception. The essential building blocks for governance are set out below.

Standing Orders

The Standing Orders were reviewed and revised by the Partnership at their meeting on 12 November 2021. The Scottish Government had, in its provisions in the Establishment Order, set out certain minimum parameters for Standing Orders and these have been incorporated wholesale into our Standing Orders. The Standing Orders have used best practice from those of other organisations and are designed to meet the needs of the Partnership. They comprise not only procedural rules regarding meetings but also financial rules which dovetail with the financial regulations as well as the tendering and contractual rules which require to be followed for all contracts entered into by HITRANS. These, with the Partnership's Financial Regulations were subject to review during 2021/22 and may in the future additionally require adapting to any new functional changes, as well as the normal requirement for periodic review.

Scheme of Delegation

In any corporate body, day to day operational decisions need to be taken by officials rather than awaiting a formal decision making process. A clear distinction can be drawn between policy making and operational decisions and this is the purpose of a scheme of delegation which allows officers to keep the Partnership's activities running whilst leaving the main policy decisions to the Board itself.

The Scheme of Delegation was reviewed and revised at the Board meeting of 12 November 2021 and represents a set of powers tailored specifically for the workings of HITRANS as they currently stand.

Financial Regulations

As part of the Partnership's commitment to the development of its corporate governance arrangements the Partnership has adopted the Financial Procedures of the Highland Council with adjustment to reflect our organizational needs and structure. The financial rules were adopted by the Partnership at their meeting on 12 November 2021 and provide the basis under which all actions overseen by staff that have financial responsibilities and interests are undertaken. The Partnership is committed to reviewing the Financial Regulations and adopted the latest version of the Highland Council Financial Regulations in 2021/22.

Human Resources policies / procedures

Comhairle nan Eilean Siar provide the function of HR advisor for HITRANS. The agreement on this commenced in January 2006 and included the production and development of several policies. The continuation of policy creation and development working with in-house staff is ongoing as and when required.

Equalities

HITRANS, as a Regional Transport Partnership, has a statutory requirement to comply with requirements associated with Race Equality, Disability Equality and Gender Equality legislation and tackle discrimination on age, religious and sexuality grounds. The requirements under these headings have a common approach and therefore an agreement on the approach to fulfilling our requirements is required.

The implementation of equalities policies is an ongoing process rather than simply the requirement to publish a specific scheme. Equal opportunities are at the heart of the HITRANS ethos and we do intend to meet our statutory duties in this regard. It must be recognised that we are also a small public authority with limited resources and influence and the scope of any scheme should reflect this.

The HITRANS Board approved an update of HITRANS Equality Duty in April 2021 and this was then presented to the Equalities Commission. The report is set out in two documents, these are:

Mainstreaming the Equality Duty. This report includes how equality becomes part of the structures, behaviours and culture of HITRANS and demonstrates how, in carrying out its functions we are promoting equality. Mainstreaming equality contributes to continuous improvement and better performance.

Equality outcomes. This report is designed to define a set of equality outcomes which it considers will enable the authority to better perform the general equity duty.

The implementation of equalities policies and practice is clearly an on-going process rather than simply the requirement to publish and monitor a specific scheme. Equal Opportunities are at the heart of the HITRANS ethos and we are committed to meeting our statutory duties in this regard. We will review the effectiveness of this change of process on an on-going basis and change it should it be found not to be identifying relevant equality matters to the Partnership.

Interaction with Stakeholders

HITRANS has established a series of effective liaison groups with transport operators, service users, linked service providers, and the wider community planning groupings across the spectrum of its activities as detailed in HITRANS Partnership Approach to Delivery in Appendix 1. The Liaison Groups serve as forums for Members and officers of the Partnership, officers from the constituent Councils and wide stakeholder interests to discuss issues relating to policy, strategy and operations, and to form a consensus view (or otherwise) to inform the Partnership Board's deliberations. The Groups have no delegated powers and are not Sub-Committees of the Partnership. As such their meetings are not regulated by HITRANS Standing Orders but add significant value to HITRANS appreciation of issues and provide direction for further development of strategy and improved delivery by the Partnership and its constituent Councils. We continue to develop the structure and processes of these groups to ensure they best meet their function. They have proven to be invaluable in ensuring close working relationships with our partners and stakeholders. As indicated above the current groups with their respective remits are described in Appendix 1.

Powers and Functions

Services should be delivered in the most efficient way and with appropriate democratic accountability in promoting a viable and sustainable region into the future. This is particularly important given the challenges being faced in funding across the public sector. HITRANS looks forward during 2022/23 to working with the Scottish Government and its agencies to help deliver better transport services. HITRANS are focused on how the Partnership, Member Councils and other public and voluntary sector bodies can best contribute to improving outcomes for the people of Scotland: by driving up the quality and accessibility of services.

A distinction can be drawn between the **powers** and **functions** of HITRANS. Dealing briefly with its **duties**, these are, principally, in two categories. The first category relates to regional transport strategies and HITRANS, like the other transport partnerships, is under an obligation to produce

a regional transport strategy and to monitor and, wherever possible, ensure its implementation (sections 5, 9 and 12 of the 2005 Act). The second category is in relation to a more general raft of duties to comply with various regulatory matters both under the 2005 Act and other pieces of legislation (auditing requirements; Ethical Standards in Public Life, etc. (Scotland) Act 2000; Freedom of Information (Scotland) Act 2002; Scottish Public Services Ombudsman Act 2002).

HITRANS' Powers

In common with all transport partnerships, HITRANS' powers are set out by the 2005 Act. In summary, the powers of the Partnership, where it sees fit, are to (references being to sections of the 2005 Act):

- require funding from its constituent councils (section 3);
- give grants and loan in implementation of the RTS (section 3);
- borrow money for specific capital expenditure (section 3);
- employ staff (para. 1 of Schedule 1);
- acquire land by agreement or compulsorily and dispose of it (paras. 6 and 9 of Schedule 1);
- develop land for its own purposes - or if surplus for other persons' use (paras. 6 and 7);
- promote or oppose private legislation (para. 10);
- participate in community planning (para. 11);
- form or promote companies (para. 12); and
- erect buildings; provide offices, entering into building contracts etc. (para. 16).

HITRANS Functions

The legislative framework setting up HITRANS recognises that transport functions are currently carried out by other bodies and makes provision for transfer of some or all of these functions in certain circumstances should HITRANS, its constituent Councils and Scottish Ministers consider this is appropriate and adds value to the delivery of transport services in the area. Section 10 of the 2005 Act provides that transport partnerships such as HITRANS can carry out transport functions either instead of the previous function provider (usually the constituent council or a Government Agency); or concurrently with that person.

To exercise further transportation functions, HITRANS would have two options. The first would be for HITRANS to reach agreement with all the constituent councils and/or the Scottish Ministers that it carries out or supports certain of the transport functions which the councils are currently providing. This route is provided by section 14 of the 2005 Act. The second, as outlined above, is to apply to the Scottish Government under section 10 for additional functions.

Application for Additional Functions

Section 10 of the Act sets out the procedure which will require to be followed, should HITRANS resolve to seek additional functional capability. The precise functions would require to be the subject of Board approval. Thereafter HITRANS would require to consult with its constituent authorities for additional functions (s.10 (6)). It would in such circumstances be our intention to report to the Board on the results of that consultation before finalising any request to the Scottish Ministers. In terms of s.10 (8), the Scottish Ministers would again consult the local authorities on any request for additional functions.

The HITRANS Regional Transport Strategy (RTS) and related Delivery Plan do not indicate any area where additional powers might be sought at this time, but areas within which the Partnership might wish to examine the benefits of attracting additional powers in supporting improved delivery of transport services across the Highlands and Islands would include:

- Ticketing - Transport (Scotland) Act 2001: S28, 29. This area presents the strongest case for HITRANS to seek powers for direct delivery, as integrated ticketing is an area where the public and stakeholders would see the greatest benefit.

- Supporting Constituent Authorities - Where constituent councils may not have the capacity and resources to deliver local authority measures, the RTP could consider providing support to the local authority to provide optimum delivery of services, implement projects and initiatives relevant to the RTS, with agreement from the relevant authority. This could be the case in developing real time information systems and management, and management of demand responsive transport services.

For HITRANS to implement the regional transport strategy, projects, and initiatives, there is no need to transfer any powers from local authorities or central government to HITRANS, but there may be benefits in taking on parallel powers to ensure that the strategy is delivered in accordance with the associated delivery plan.

5. Funding

Our Business Plan should be based upon a realistic estimate of the funding which is likely to be available to HITRANS. HITRANS 2022/23 Grant-in-aid from Scottish Government/Transport Scotland has been confirmed at £522,750 (the same as last year) to fund revenue expenditure to support implementation of the Regional Transport Strategy.

Sustrans have confirmed a grant of £100,000 to HITRANS in 2022/23 for the Active Travel Partnership Project.

Transport Scotland have confirmed a grant of £1,111,500 to HITRANS in 2022/23 for the Regional Active Travel Fund.

Transport Scotland have confirmed a grant of £408,772 to HITRANS in 2021/22 and 2022/23 for the MaaS Investment Fund.

Scottish Government have confirmed a grant of £90,000 to HITRANS for Digital and Demand Responsive Transport.

Transport Scotland have confirmed contribution to HITRANS to cover the match funding requirement for the SEUPB programme FASTER project (grant of £250,000) and North West Europe programme eHUBS project (grant of £120,000).

Constituent Authority Requisitions

The Transport (Scotland) Act 2005 requires the constituent councils of each Regional Transport Partnership to fund its net expenses, after allowing for any income, including any grants from the Scottish Government. In 2020/21 HITRANS constituent Councils contributed £200,000 towards the Partnership's net expenses. This represents match funding to complement the Scottish Government's revenue Grant-in-aid contribution towards nominal Core Funding. For the purposes of development of the business plan, HITRANS has intimated to the partner authorities a proposed requisition of £200,000 as core revenue funding for 2022/23.

The detailed Revenue Budget for 2022/23 is shown in Appendix 2.

Revenue: Other sources of funding

To deliver on our aspirations HITRANS investigate a wide range of funding opportunities. There are numerous European funding initiatives available to the Partnership as well as central Government funding. These opportunities continue to be assessed by HITRANS and we have enjoyed success through our engagement with other regions across Europe. Some successes that we have achieved in this arena are listed below and these represent current live projects:

- ERDF – Inverness the Smart City is a project that HITRANS will deliver in partnership with Highland Council with each local partner providing an equal share of the local budget contribution to secure a significant ERDF contribution.
- G-PaTRA is a North Sea Region Programme project. The aim of the project is to test through lighthouse pilot projects ways of delivering low carbon / zero carbon public transport in rural areas.
- MOVE is a North Sea Region Programme project. The aim of the project is to increase accessibility and availability of shared transport services thereby individual car usage, emissions and costs.

- Stronger Combined is a North Sea Region Programme project. The aim of the project is to develop Mobility as a Service (MaaS) in rural areas.
- PAV – is a North Sea Region Programme project. The aim of the project is to improve understanding of connected and autonomous vehicles and support their introduction by local transport authorities.
- FASTER – is a Special EU Projects Body Cross Border Cooperation programme project. The aim of FASTER is to deliver EV charging infrastructure in the programme area which is Argyll & Bute, Western Isles, Lochaber, Skye and Lochalsh. HITRANS will install 24 rapid EV charger units through the project.
- eHubs is a North West Europe project that has secured 450,000 Euros for e-bikes, e-cargo bikes, e-car clubs, EV charge point & MaaS costs to launch at least 4 eHUBS in Inverness.
- RURALITIES is a Horizon Europe project which will commence in 2022. HITRANS budget for this project will be

Borrowing

Under the Transport (Scotland) Act 2005, HITRANS is permitted to borrow money for the purposes of its capital expenditure. HITRANS must have regard to the Prudential Code for Capital Finance in Local Authorities when determining any programme for capital investment. The key objectives of the Prudential Code are to ensure that the capital investment plans of local authorities are affordable, prudent and sustainable. No borrowing for the purposes of capital expenditure is anticipated during the period covered by this business plan. The Regional Transport Partnerships as a group continue to engage with Government and CoSLA on whether these powers and developing other potential funding opportunities may through joint working help support Government in delivering the Economic Strategy.

Reserves

It is the responsibility of the Treasurer to advise the Partnership about the level of reserves that they should hold and to ensure that there are clear protocols in place for their establishment and use. Guidance issued by CIPFA advises that local authorities and Partnerships, on the advice of their Finance Directors / Treasurers should make their own judgements regarding an appropriate level of reserves, considering all the relevant local circumstances.

Under the Transport (Scotland) Act 2005, constituent authorities are required to meet the net expenses of the Partnership. Section 122 of the Transport (Scotland) Act 2019 amended previous provision in respect to RTP Financial Arrangements to permit carrying a reserve across financial years. This is anticipated to be not more than 15% of the revenue budget.

6. The Regional Transport Strategy (RTS)

The HITRANS Regional Transport Strategy was refreshed in full in the period leading up to 2019. The document remains in draft at present as Ministers advised that approval of the RTS had to be delayed pending completion of the National Transport Strategy to ensure regional and national transport strategies align. With completion of NTS 2 in February 2020 and STPR 2 having reached final draft stage it is important that HITRANS RTS aligns well with these key documents. Consultants Stantec were awarded a contract to renew HITRANS RTS picking up from the 2018 document. The update will include the development of a Case for Change report before drafting the final Strategy.

Monitoring and Evaluation

It is important that HITRANS demonstrates that it is achieving its aims and objectives. The RTS provides a basis for monitoring and evaluation and the means of measuring success of implementation in a factual manner was comprehensively overhauled in 2017/18. Updates on performance against targets will be reported to the Board on a regular basis and included in the Partnership's Annual Report using the Framework that has been developed. Further enhancement of this process will take place annually.

Delivery Mechanisms

The Programme of Research and Strategy Development proposed to be undertaken by HITRANS during 2022-2024 to support delivery of the Regional Transport Strategy is detailed in Appendix 3 to this Plan.

Risk

HITRANS financial position requires stringent management and at times difficult decisions over resource priorities. It is important, therefore, that the maximum amount of resources is channelled into achieving HITRANS's objectives. There are, however, risks to us achieving these objectives. Risks are inevitable and, in practice, cannot be avoided. Risks, therefore, must be managed, understood and controlled if we are to meet our objectives.

Risk management is about managing the Partnership's exposure to risk, the probability of it occurring and the impact it would have. It involves identifying the risks, assessing them and responding to them. Risk management is not restricted to limiting adverse outcomes and it can be used to achieve desirable outcomes.

Consequently, HITRANS needs to be pro-active and prepared in the way we manage our risk portfolio. Incorporating a more formal approach to risk management in our day to day operations will enable us to deliver our responsibilities and work towards achieving our objectives. In fact, management of risks is fundamental to ensuring that we fulfil our objectives.

The Partnership operates a Risk Management Strategy with a Risk Register which is reviewed regularly. This strategy is firmly embedded in the work of the Partnership and is subject to annual review through the Partnership board meeting process.

7. Revenue

The Research/Strategy Development Programme for 2022/23 and the programme for delivery are as detailed in Appendix 3.

8. Marketing & Communications

The objective of HITRANS' marketing & communications strategy and Action Plan, is to increase awareness of our role and objectives among the travelling public within the Highlands and Islands of Scotland, engender change in public behaviour towards transportation, and indicate to our partners and other stakeholders that HITRANS is achieving its aims.

Our communications objectives through 2022/23 will be to:

- Provide Newsletters following Partnership Meetings to publicise the decisions taken at the Meeting and the actions currently being taken by HITRANS to promote delivery of the RTS.
- Redevelop the HITRANS Website content to make it more informative and accessible.
- Continue to make people aware of what we are doing and why, explained in terms of the high level aims of the RTS, what HITRANS aims to deliver as described in the RTS and the benefits that will accrue to business and the population of the region.
- Encourage behavioural change among the public in line with the objectives laid out in the RTS – e.g. making “smart travel choices” including: greater use of public transport, car sharing, personal travel plans, alternative and active transport options, etc, through highlighting the advantages, practical benefits and needs which these address.
- Promotion and marketing of the GO-HI MaaS Platform.

9. Resources

Establishment

With effect of 1st April 2022, HITRANS will employ 14 staff (13 FTE):

Ranald Robertson - Partnership Director
Neil MacRae - Partnership Manager
Frank Roach – Partnership Manager
Katy Cunningham - Business Manager
Vikki Trelfer – Active Travel Officer
Shirleen Ariwi – Public Transport Information Support Officer
Jayne Golding – Projects and Policy Manager
Kirsten Gow – Scottish Islands Passport Project Manager (job share)
Sarah Compton-Bishop – Scottish Islands Passport Project Manager (job share)
Rachael Fraser – Project Officer (Finance) – on Maternity Leave
Gemma Robinson – Project Officer (EV Infrastructure / FASTER)
Kelly Martin – Project Officer (Smart Mobility)
Rebecca Purvis – Project Officer (Digital and DRT)
Clare Harper – Business Support Assistant (Maternity Leave Cover)

The specific areas of engagement and activities of each employee in 2022/23 are detailed in HITRANS Partnership Approach to Delivery in Appendix 1.

Consultants will be engaged as and when required to support strategy, research and project requirements, in line with our ongoing practice.

Permanent Advisors

The Partnership invites input from a few Key Stakeholders at officer level on a regular basis through Permanent Advisor Meetings and ad hoc contact on specific issues. As well as a senior transportation officer from each of the 5 constituent Councils a representative from the following organisations participates on an on-going basis in our Advisory arrangements

Highland and Islands Enterprise
Scottish Council for Development and Industry

Accommodation

The Partnership employees are located in 3 offices, at Inverness, Jura and Lairg.

Equipment / IT Resources

To maintain efficiency and effectiveness HITRANS practice has been to replace PCs on a 3-year cycle. The redundant units are kept as standby units where serviceable.

Zoom and Microsoft Teams are used to support video conferencing by Partnership officers both for internal and external meetings and to participate in conference calls. The Partnership officers aim to utilise these systems to minimise the need for unnecessary travel and produce efficiency gains.

10. HITRANS Response to the Climate Emergency – What We Can / Are Doing

The Committee on Climate Change has reported that the Scottish Parliament’s target to reduce emissions by 75% by 2030 will be extremely challenging to meet, and must immediately be backed up by steps to drive meaningful reductions in emissions. Transport accounts for 37% of all carbon emissions in Scotland, and emissions from transport are now at the highest level since the Climate Change (Scotland) Act was passed in 2009. Cars, vans and heavy goods vehicles (HGVs) account for 65% of total transport emissions.

Addressing the climate emergency demands urgent action; a change of mode and mindset, not just fuel, is required. Huge benefits will result from a transport revolution which allows us all to shift to active and sustainable options, and improves all modes of transport. People using public transport are more likely to be active, which in turn improves physical and mental health and well-being. Affordability of passenger transport should also be a feature of this focus and it is important that a price competitive alternative to the private car is available to everyone.

Scottish Government have updated the Climate Change Plan to provide clear targets to ensure a coordinated approach is taken and set Scotland on the path to a Green Recovery from COVID-19. The Plan emphasises bold action to be taken now before the next full update of the Plan in 2025. The update commits to reduce average car kilometres in Scotland by 20% by 2030 and phase out new petrol and diesel cars and vans by the same year.

The changes to working practice during the Coronavirus / COVID-19 lockdown have demonstrated the potential to increase agile working and a more flexible approach to working time and travel to and for work. HITRANS will continue to support officers to work flexibly and engage with partners on supporting a reduction in the need to travel.

HITRANS works to improve transport services and infrastructure in the north of Scotland and on routes to the Highlands and Islands, and has a role to play in delivering the urgent action required to respond to the climate emergency.

Active Travel

Walking and cycling, particularly for everyday journeys, have a wide range of benefits; walking is the most accessible form of travel, and both walking and cycling can be quick, low-cost, convenient and enjoyable ways to travel.

The Scottish Government’s Active Travel Framework brings together key policy approaches to improve the uptake of walking and cycling: “More people choosing to walk and cycle will reduce pollution and emissions from motorised travel and so help tackle climate change.”

HITRANS’ work in active travel can help reduce transport emissions by encouraging modal shift to replace short car journeys with walking or cycling, and linking active travel with sustainable modes for longer journeys.

Encouraging and enabling more people to travel through active modes; this will contribute to reducing emissions:

- Work with bus companies to enable carriage of cycles on buses
- Provision of cycle parking at bus stops / transport interchanges to integrate cycling with other transport modes for 1st/last mile of journeys

- Develop a series of active travel maps highlighting safe walking and cycling routes within and between communities
- Work with partners to develop walking and cycling friendly roads in rural areas
- Promote Traveline Scotland as a planning tool for sustainable travel

Ensure high quality active travel infrastructure is available to all; this can accelerate the desired shift in travel behavior for shorter journeys:

- Updating active travel audits for key towns in the HITRANS area into deliverable masterplans
- Funding for design of high quality active travel infrastructure and small interventions to remove barriers to active travel

Ensure that walking, cycling and wheeling is available to all:

- Pilot project to make ebikes available in Cairngorms National Park and Fort William
- Implement a public bike share scheme in Inverness

Promote and support active travel through a broad range of partners, to foster a culture that enables and encourages walking and cycling:

- Working with 5 Local Authorities, CNPA, local community groups and Development Trusts, and businesses

HITRANS also host and promote Hltravel Liftshare, a platform which connects people offering a lift with those wanting a lift across the Highlands and Islands, with the aim of reducing single occupancy car journeys and therefore reducing carbon emissions.

Bus

While bus accounts for the large majority of all trips made by public transport, bus kilometres and passenger numbers continue to decline. Figure 6 below from the National Transport Strategy highlights the factors which result in the decline of bus and the interventions required to reverse this cycle.

Figure 6: The bus circles of decline and growth

Whatever the causes of the decline in bus use, reducing passenger numbers risks driving down revenues and making some services unviable, resulting in their cancellations and, in some cases, communities becoming isolated⁶¹.

Much of the Highlands and Islands, like other parts of rural Scotland, need increased support for operating basic levels of bus services that enable people to access employment, education and social opportunities in their local area as well as high quality supporting infrastructure (park and ride, high quality information and waiting shelters). With the right infrastructure and support, local bus services also offer an excellent focus to help communities transition to Electric Vehicles.

Things HITRANS could do / are doing:

- Support transition from diesel to electric buses: including support for Scotland's first 100% Electric Vehicles operating on local services in Inverness; Electric Bus operating in Strathspey in partnership with Moray Council through HITRANS involvement in the G-PaTra EU InterReg project
- Manage the real-time public transport Information system and on-street displays across HITRANS area with the roll out of an enhanced service following the recent award of a new contract supported through HITRANS involvement in the ERDF 'Scotland's 8th City – the Smart City' project.
- Continue to manage the public transport information database on behalf of HITRANS partner Local Authorities and produce at stop information displays for over 2000 bus stops in our region.
- Use funding from HITRANS participation in a number of EU InterReg projects, including MOVE and Stronger Combined, to pilot innovative public transport solutions across the HITRANS area such as the Demand Responsive service using an 8 seater EV in Sleat, Skye that has been implemented in partnership with The Highland Council and the local Development Trust.
- Lead implementation of MaaS pilot in Highlands and Islands as one of only two successful applications to the initial round of Scottish Governments MaaS Investment Fund.

- Re-established a Regional Bus Forum to help initiate Bus Service Improvement Partnerships in each area that can be a focus for delivering measures to deliver the 'Circle for growth' and work towards Regional Transport Strategy aspiration of a minimum 3 daily public transport journeys in each area to / from the nearest regional centre.

Rail

Scottish Government plans to decarbonise rail by 2035. HITRANS is keen to support this objective, and we already have a track record in promoting electrification (Inversparkie) and alternatively powered trains (Wick-Thurso Feasibility Battery Trains).

HITRANS has made the case for continued improvements on the Highland Main Line, through pre STPR1 Room for Growth in 2007. Later reports Pre-ten O Clock and Inversparkie demonstrated the need for the railway to be available for longer periods and electrified to reduce emissions, noting through HML Unfazed that STPR1 outputs have not significantly reduced journey time or enhanced capacity and capability. The aged, thirsty diesel HST fleet has a limited shelf life. An early decision is required on electrification for Inverness-Perth-Dunblane, and for proposals to be considered for Inverness-Aberdeen, in order for procurement to begin; delays will result in a suboptimal bi-mode fleet being deployed.

We have developed proposals (Platform4Change) for our largest station, Inverness, based on research into passengers' experiences and an understanding of the impact on operations of growth to 2043, noted in Network Rail's Scotland Route Study(2016). We will begin a masterplanning exercise on the creation of an integrated transport interchange in 2020, with co-located bus, taxi and active travel facilities alongside a maintenance depot that can fuel hydrogen trains, buses and trucks.

On our rural routes we seek alternatively powered trains that are lightweight, comfortable, with large windows for scenic viewing. We have examined battery trains for Wick-Thurso, using renewable energy in Caithness that is often constrained from going into the grid, and considered tram-train technology for the Kyle line.

All services must have full accessibility matched by accessible stations, recognising that this can be a challenge with island platforms, while cycle facilities on and off the trains must be enhanced for regular commuters and visitors alike.

Having pioneered low-cost stations (Beauly, Conon Bridge) we will support further new stations where the emphasis will be on carless access to places of employment and education.

Rural stations should receive derogations from mainline standards on platform length, height, illumination etc, while developments in signalling capability will allow more functions to be delivered electronically, including remote monitoring of structures, and control of points and level crossings- all areas that have arisen from the Points North work undertaken by us since 2015.

Freight transfer to rail will be encouraged by rail electrification, and the possibility of last mile delivery by electric cart, and the payload gain of rail over higher tare-weighted hydrogen/battery HGVs.

Through Branchliner we will continue to develop the case for state involvement in freight wagon procurement as an alternative to funding expensive and potentially speculative infrastructure enhancement.

Ferries

Ferry services will have an important contribution to make to decarbonising the Scottish transport system. The introduction of the hybrid diesel electric Loch Class ferries (Hallaig, Lochinvar and Catriona) represented a significant step towards reducing the emissions from ferry services. However, these vessels still require a fossil fuel source and create emissions albeit on a reduced basis from earlier Loch Class vessels. Similarly the progress made towards reducing emissions from large ferries has seen a move towards a dual fossil fuel approach that supplements MDO (Marine Diesel) with LNG (Liquid Natural Gas).

There is international practice now for the introduction of fully electric ferries and work is underway in Scotland to understand the potential for Hydrogen as a fuel source for ferry services including for major vessels. Two workstreams being progressed in Scotland (with input from CMAL, OIC and other key stakeholders are listed below with a link for more detailed information:

- Hyseas 3 project – HySeas III is a Horizon 2020 funded project with partners including Ferguson Marine, Ballard Power Systems, Kongsberg Maritime AS, McPhy Energy, Orkney Islands Council and University of St Andrews. The project is the final development stage of a programme to deliver a sea-going vehicle and passenger ferry that will employ carbon-free hydrogen as energy source.
- Point and Sandwick Development Trust in collaboration with several industry have published a feasibility study to assess the suitability of using hydrogen produced from local wind farms to power future ferry services operating on the CHFS network.

The short term need to invest in modernizing the Scottish ferry fleet following decades of underinvestment is such an imperative that island areas cannot wait for technology to catch up and allow new major ferries on long routes to our islands to be zero carbon. However consideration can be given to investing in reduced carbon emission ferries that could at a later stage be retrofitted with new engine technology as Hydrogen (and other sources) become a practical option.

HITRANS will continue to support efforts to decarbonise our ferry services by:

- Support R&D of hydrogen ferries.
- Continue to look at the development of fixed links to replace short ferry crossings which will support transport system decarbonization.
- Potential for Scotland / Highlands to become world leader on hydrogen fuel (lots of water resource & renewable energy potential)

Roads

In working with partners to deliver a Low Carbon Region, HITRANS continues to highlight that the Highlands and Islands still requires significant investment in our trunk road network and other locally significant Local Authority managed routes. This investment is primarily not required to increase the capacity of the network as in other areas but rather to bring our strategic road network up to basic design standards for the traffic which they currently cater for. This includes our continued support for the upgrade of the A82, in particular the section between Tarbert and Inverarnan and through Fort William and sustainable solutions on the A83 at the Rest and Be Thankful and at Stromeferry on the A890. We also continue to support the transformational A9 and A96 upgrades for which design and now delivery of initial sections is underway. Targeted safety improvements are also required on other key routes including

several junctions on the A9 north of Inverness and on other key routes including the A95 and the main routes through Mull and the Western Isles.

Investment in this strategic network will: improve the regions competitiveness by reducing journey times, improving journey reliability and road safety and tackling perceptions of remoteness and peripherality.

There is also a major opportunity to ensure that the investment in committed road improvements to the A9, A96 and A82 can act as a catalyst to transitioning both freight and private traffic to electric, hydrogen and Connected and Autonomous Vehicle (CAV) alternatives.

In updating our Regional Transport Strategy and developing the first regional EV Strategy, we have set out how HITRANS will support the transition to ultra low carbon / carbon neutral road transport.

- Support improvement of existing road infrastructure, and addition of active travel routes, particularly where trunk road presents a barrier to active travel between communities.
- Ensure non motorised user needs are fully addressed in new road building programmes.
- Recognise the sustainable travel hierarchy at the heart of NTS2

HITRANS are also members in a number of EU and ERDF projects which hope to assist the transition away from fossil fuels. These include FASTER which is an ERDF project involving the expansion of the EV charging network in the West Highlands and Islands and PAV, an EU InterReg project piloting Connected and Autonomous Vehicles for which HITRANS are the lead partner.

Aviation

The First Minister set out Government's ambitions on reducing the carbon impact of aviation in the 2019 Programme for Government which set a path towards decarbonise flights within Scotland by 2040. This could see the Highlands and Islands become Europe's first net zero aviation region. HITRANS were already engaged with partners in support of reducing the carbon impact of aviation through our work on SPARA 2020 and working with HIAL, OIC and others to support projects that will see a move to the electrification of planes operating our internal aviation network. Through our business plan HITRANS will work with partners to:

- Support R&D of fleet conversion to electric for short-distance flights (eg. inter-island, island – mainland and Highland mainland to national centres)
- Seek funds to decarbonize airports and airside surface activity,
- Support low carbon surface access strategies for travel to and from airports.

Appendix 1: The Partnership Approach to Delivery

Summary

HITRANS is committed to working with all sectors and interests within transport in adding value to the transport services delivered across the region. This note indicates the structures HITRANS has put in place to achieve this aim.

Involvement in each area of policy development and delivery

The partnership has identified eight areas in which it would aim to work towards improving service provision as follows

Area	Description
Active travel	Walking, cycling, accessibility
Community and health transport	Third sector transport, social and health transport, car sharing schemes, accessibility
Bus	Supported and commercial bus services, and taxis. Accessibility.
Rail	Passenger and freight rail services. Accessibility.
Transport Infrastructure	Roads (both trunk and local), Rail Infrastructure, Airports, Ports, Harbours, and Ferries. Access / accessibility for all.
Freight	Cross modal, road, rail, ferry, air and sea
Ferry	Supported and commercial ferry services, national and local. Accessibility.
Air	Supported and commercial air passenger services, including charter and freight. Accessibility.

In each area HITRANS will seek active participation from the 5 constituent Councils, our Community Planning Partners, Stakeholders, Operators, Permanent Advisors and the Board. HITRANS will encourage its Community Planning Partners, Stakeholders and Operators to participate in policy development and delivery options appraisal. Operators will be encouraged to interact not only within their individual area of expertise but across the 8 areas and will be given the opportunity individually to discuss issues with Board Members. This will allow HITRANS the greatest opportunity to learn from their knowledge and experience.

Objectives

HITRANS wishes to ensure maximum effective involvement of all groups and will devise, in each service area, mechanisms and structures that will ensure that each group's views are heard and their input valued in ensuring the Partnership delivers improved transport services across the region. HITRANS has formed and will continue to develop advisory and consultative groups both within and between linked transport areas, to promote improved integration across the Highlands and Islands. Regular meetings of these groups are arranged to obtain valuable input and provide information on developments and proposals and updates will be provided on the HITRANS website.

Engagement with Stakeholders and Operators

The following are the HITRANS proposed arrangements for engagement and consultation in 2022 / 23.

Area	Proposed action
Rail	Users and A+C Groups Meet 2x Stakeholders 1x
RTIG	Stakeholders – meet 1x
Bus, Community and Health Transport	Meet Health Boards, And engage with Community Transport Operators
Active Travel	A+C forum Meet 2x
Air	Stakeholder meeting 1x
Ferry	Ferry User Group Meetings
Freight	Meetings of Freight Quality Forum
Transport Infrastructure	Operator meetings, trunk, rail, air, meet each 1x
Equality Issues Development	Feedback from Council Permanent Advisors
Public Transport co-ordination	Meeting of public transport officers of each Council

Key

A+C	Advisory and Consultative	
RR	Ranald Robertson	Partnership Director
NM	Neil MacRae	Partnership Manager
FR	Frank Roach	Partnership Manager
KC	Katy Cunningham	Business Manager
VT	Vikki Trelfer	Active Travel Officer
SA	Shirleen Ariwi	Public Transport Information Officer
JG	Jayne Golding	Projects and Policy Manager
KM	Kelly Martin	Project Officer (Smart Mobility)
GR	Gemma Robinson	Project Officer (FASTER / EV Infrastructure)
RP	Rebecca Purvis	Project Officer (Digital and DRT)
RF	Rachael Fraser	Project Officer (Finance)
SIP	Sarah Compton-Bishop / Kirsten Gow	Project Manager, Scottish Islands Passport
EF	Edward Foster	Head of Finance (THC)
DM	Derek Mackay	Partnership Secretary (CNES)
LC	Laura Cromarty	HITCOG Chair
HR	Lena Murray	HR support (CNES)
AM	Allan MacDonald	Legal (CNES)

Delivery Areas – Lead officer

Area	Administration	Development	Stakeholder Engagement
Rail	KC	FR	KC/FR
Bus, Community and Health Transport	RP	RP	RP/NM
Active Travel	VT	VT	VT
Air	JG	NM	JG/NM
Ferry	KC	RR/NM	KC/NM/RR
Electric Vehicle Infrastructure	GR	GR	GR
Mobility as a Service	SA / RP / KM	SA / RP / KM / NM / RR	SA / RP / KM / NM / RR
Transport Infrastructure	KM	RR/NM/FR/VT/KM	RR/NM/FR/VT/ KM
Equalities	JG	JG	JG
Integration of Services	SA	SA/VT/NM/FR	SA/VT
Public Transport Information and Coordination	SA	SA/NM/LC	SA/NM/LC

Other Areas of Partnership Activity

Area	Lead	Comment
RTS Development - Monitoring and evaluation	RR, NM	RTS approved by Government. Framework and targets produced to assess success in achieving outcomes linked to governments objectives
Community Planning – engagement in CPPs	RR, Council Advisors and Board member for each CPP areal	Critical that the development and implementation of SOAs and cross sector agreement of priorities reflects the importance of transport in all public and private sector delivery areas
Learning from European Best Practice – Working with partners in EU	JG	Intention to identify opportunities for working with partners to develop best practice, and investigating opportunities for engagement
RTPs – joint working	Chair and RR	Joint working to support government in achieving its Purpose and key national outcomes

Working to support Councils	Individual Council Board Members and Council Permanent Advisors	Engage with Councils to support the development of their SOAs and to support optimum development of best practice throughout the H+I
Joint Working between Councils	RR / NM / FR	Delivery of working arrangements between the 5 Councils to encourage sharing of resources and expertise and to support Government in delivering IIP and Regional priorities.
North West Europe Project	KM / JG / RR	Provide HITRANS input to North West Europe Region Programme.
Smart Cities ERDF	NM / RR / JG	HITRANS input to Smart Cities ERDF project.
North Sea Region Projects	KM / RP / NM / JG / RR	Provide HITRANS input to North Sea Region Programme.
Horizon Europe Projects	JG / KM / NM / RR	HITRANS input to the three Horizon Europe projects and submissions made by HITRANS.
Travel Planning	NM / VT / SA	KC supporting in promoting sustainable transport arrangements by public and private sector employers and employees
Development Planning	NM	Inputting into the development of Council's Development Plans, and engaging in pre-consultation during development of large scale projects within and across Council areas

HITRANS General and Support Activities

In meeting its aims and objectives the Partnership is involved in a wide area of general and support activities. These are identified below with details of the roles of both employees and support service providers during 2022/23

Function	Sub function/description	Lead Officer
Revenue budget management	Overall budget management THC Internal systems plus inputting to THC Individual budget line management	EF KC RR/FR/NM/VT/ JG
Equalities issues management	Implementation of HITRANS approach to Equalities	JG
Board administration	Overall administration by WI Distribution of papers and local admin	DM KC
HR and Legal support	HR – CNES support Legal – CNES advice and support	HR/RR AM/RR
Travel Planning	Promote Travel Planning by Employers and monitor success	VT with external support
Press Relations/Promotion	Establish delivery mechanisms to best meet the Partnership's needs, including Newsletters	RR/FR/NM/JG with external support
Integration of Public Transport	Improve linkages between transport modes and service providers	FR/NM/SA/KM/RP/VT
Community Planning	Engage in Community Planning across the highlands and islands	RR supported by KC
Study Management	Delivery of research programme	RR/FR/NM/VT/JG with external support
Project Management	Delivery of individual projects	VT/JG/NM/FR/RR
IT and Website Management	Support by external supplier RR/FR/NM/KC input to website	RR/KC
Meetings, Events and Diary Management	Organisation/management of events and Board Meetings	KC
Member/ Officer/ Advisor Travel arrangements	Organisation, management and arrangements for payment	KC
Employee Development	Complete Personal Development Reviews for each employee	RR

Appendix 2: Revenue Budget for 2021/22

Budget Heading	Budget 2021/22	Budget 2022/23 Recommendation
Income		
Argyll and Bute	£26,200	£26,200
CnES	£18,600	£18,600
Highland	£90,900	£90,900
Moray	£46,800	£46,800
Orkney	£17,500	£17,500
Scottish Government - Core	£200,000	£200,000
Scottish Government – Non-core	£322,750	£322,750
SUSTRANS – Active Travel	£100,000	£100,000
Grants – Regional Active Travel	£267,000	£267,000
European and Other Project Grants	£188,000	£188,000
Total Income	£1,277,750	£1,277,750
Running Costs		
Staff Salary Costs	£412,000	£416,120
Staff/Members/Advisors Travel/Subsistence	£14,000	£14,000
Partnership/Consultation Meetings	£6,000	£6,000
Office Costs - Property	£22,000	£22,000
Office Costs - Administration	£25,000	£25,000
	£479,000	£483,120
Programme Costs		
Publicity	£10,000	£10,000
Research and Strategy Development	£293,750	£289,630
Specific Ring-fenced Project Costs	£267,000	£267,000
European and Other Project Salary Costs	£188,000	£188,000
	£758,750	£754,630
Finance/HR/Legal/Admin		
CnEs	£8,000	£8,000
Highland	£21,500	£21,500
External Audit	£10,500	£10,500
	£40,000	£40,000
Total Costs	£1,277,750	£1,277,750

Appendix 3: Research/strategy development programme for 2022 – 2024

Area	Project	2022/23	2023/24
Active Travel	Smarter Choices Smarter Places Match Funding and CL/CL+ Support	20,000	30,000
	CnES SCSP Programme	100,000 (est)	100,000 (est)
	Regional Active Travel Fund	1,111,500	1,111,500
	SUSTRANS Partnership / Active Travel Projects	100,000	100,000
Aviation	Zero Carbon Aviation Region Opportunities	15,000	5,000
	Oban GNSS Approach Procedure Design	17,500	
External Funding	Stronger Combined Project	50,000	30,000
	G-PaTRA	15,000	
	eHubs Project	150,000	
	ERDF Smart Mobility	50,000	50,000
	MOVE Project	20,000	
	FASTER Project	500,000	500,000
	PAV Project	500,000	200,000
	ERDF / INTERREG / SG Bid Project Support	5,000	
Travel Information	Intelligent Transport Systems	15,000	15,000
	Real Time Information Development	15,000	15,000
RTS	Regionally Significant Scheme Development	50,000	50,000
	Skye Integrated Transport Plan	6,500	0
	Lochaber Health and Social Care Transport and Access Action Plan	5,000	0
	EV Strategy	10,000	10,000
Rail	Rail Policy Development	30,000	30,000
	Inverness Station Masterplan	15,000	15,000
Bus / DRT	Bus Service Development, Bus Partnership Fund support and HiTravel	30,000	30,000
	Total Identified Project Expenditure	2,830,500	2,191,500
	Current Estimated Budget (R&D)	350,000	350,000
	Current Estimated Budget (External - EU, Sustrans, Transport Scotland Ring Fenced Project Support)	2,511,500	2,511,500
